CME
Osteopathy’s Promise to Children (OPC) designates this program for a maximum of 23 Hours of AOA Category 1-A credits and will report CME and specialty credits commensurate with the extent of the physician’s participation in this activity. ADA CME credits are also anticipated and pending approval.

ENROLLMENT FEE
$1,050 (USD). Includes CME credits, course manual and materials, daily continental breakfast and lunch, morning and afternoon snacks. Course manual will be provided. Recommended reading: Osteopathy in the Cranial Field, 1st Ed. by Harold I. Magoun, Sr.

ACCOMMODATIONS
Hilton Garden Inn, contact Edlyn.Besek@hgimissionvalley.com.

TARGET AUDIENCE
DOs, MDs, DDSs and other qualified practitioners who have successfully completed an approved (Osteopathy’s Promise to Children, Osteopathic Cranial Academy, or Sutherland Cranial Teaching Foundation) 40-hour basic cranial course.

PREREQUISITE
See Proof of Eligibility and Prerequisites Policy for Enrollment in CME courses on our website.

COURSE DESCRIPTION
This course builds on the topics taught in the basic cranial course. The aim of the course is to take the practitioner to the next level of diagnostic and treatment ability when using OCMM. The student will learn more advanced diagnostic techniques, such as how to determine whether a cranial somatic dysfunction originates in bone, membrane or fluid, or a combination of these elements. Attention is given to direct and indirect approaches to specific temporal and facial restrictions. A particular highlight of this course is an in-depth approach to temporomandibular joint and malocclusal problems, how the ALF (Alternative Light-Wire Functional) appliance is used with these conditions, and how to collaborate with dental practitioners. Other topics include: treatment sequencing approaches, clinical pearls, how to incorporate osteopathic cranial manipulative medicine into clinical practice, and a research update.

SCHEDULE
FRIDAY, MAY 5, 2017
8:00am Course information
8:30am Palpating the PRM: forearm, vault, sacrum; sensing the whole-body nature of the PRM
9:30am SBS and quadrant diagnosis; treatment sequencing
10:30am BREAK
10:15am SBS and quadrant diagnosis; treatment sequencing
12:00pm LUNCH (provided)
1:00pm TMJ dysfunction – an osteopathic view
3:00pm BREAK
3:15pm Temporal bone - direct and indirect approaches, Part 1
5:30pm Adjourn

SATURDAY, MAY 6, 2017
8:00am Temporal bone - direct and indirect approaches, Part 2
10:00am BREAK
10:15am Viola’s Imperative: Looking beyond the Teeth through the comprehensive perspective of osteopathy
12:00pm LUNCH (provided)
1:00pm The Face
2:15pm BREAK
2:30pm Facial and intraoral techniques, Part 1
4:30pm Collaboration, using 3D technology and osteopathy to expand our understanding and capabilities
6:00pm Adjourn

SUNDAY, MAY 7, 2017
8:00am Facial and intraoral techniques, Part 2
10:00am BREAK
10:15am What does Osteopathic-Dental collaboration look like? (with Dr. Julie Mai, DO and Dr. Theresa Cyr, DO)
12:00pm LUNCH (provided)
1:00pm What does Osteopathic-Dental collaboration look like? (Part 2)
2:30pm Q&A; Review; Check heads
5:00pm Adjourn
COURSE OBJECTIVES
After successful completion of this course, the participant will be able to:
1. Perform deeper, more body-wide palpation and diagnosis;
2. Apply more detailed direct and indirect technique approaches for the face, intraoral structures, temporal bones and mandible, and especially in relation to dental and malocclusal problems;
3. Describe the ALF appliance and its role in the treatment dental and malocclusal problems; and
4. Diagnose and treat clinical problems such as temporomandibular joint dysfunction, head and neck pain syndromes, and cranial nerve entrapments associated with cranial somatic dysfunctions.

COURSE CANCELLATION AND REFUND POLICY
By submitting an application for this course, the applicant (the “Applicant”) agrees that fifteen percent (15%) of the total registration fee is a non-refundable administrative charge. If after submitting a course application the Applicant desires to cancel his or her registration, the Applicant must notify Osteopathy’s Promise to Children ("OPC") in writing no less than fourteen (14) calendar days prior to the initial start date for the course. If Applicant timely and properly notifies OPC of its cancellation, OPC will issue a refund to Applicant in the amount of eighty-five percent (85%) of his or her total registration fee. If OPC receives a notice of cancellation less than fourteen (14) days prior to the initial start date for the course, OPC will not issue a refund. Unless Applicant timely and properly notifies OPC pursuant to this policy, OPC will not issue a refund for an applicant’s failure to attend the course.

LIABILITY RELEASE
This program may involve physical activity, including contact by and with faculty and other course participants. This physical activity, including but not limited to physical diagnostics and manual therapeutics, could possibly entail risk for course participants of new injury or aggravation of pre-existing conditions. All course participants acknowledge and agree to assume all responsibility and risk for all losses and damages, including but not limited to any bodily injury, death, and property damage, arising out of or incident to (i) attending the course, (ii) participating in the course, (iii) using equipment or facilities during the course, and (iv) using or misusing any knowledge or information obtained or derived from the course. All course participants acknowledge and agree to indemnify, defend, and hold harmless OPC, OPC’s officers, directors, employees, agents, affiliates, licensors, partners, independent contractors, suppliers and subcontractors from and against all claims, actions, suits, proceedings, losses, obligations, damages including but not limited to any bodily injury, death, and property damage, liabilities, costs, debt and expenses, whether known or unknown, anticipated or unanticipated, arising out of or incident to (i) attending the course, (ii) participating in the course, (iii) using the equipment or facilities during the course, or (iv) using or misusing any knowledge or information obtained or derived from the course at or outside of the course location. OPC reserves the right, at course participant’s expense, to assume the exclusive defense and control of any matter for which course participant is required to indemnify OPC and course participant agrees to cooperate with OPC’s defense of these claims. Course participant agrees not to settle any matter without the prior written consent of OPC. OPC will use reasonable efforts to notify course participant of any such claim, action, suit, or proceeding upon becoming aware of it. It is the responsibility of all participants to use the information provided within the scope of their professional license or practice.

COURSE DIRECTORS
Raymond J. Hruby, DO, MS, FAAO graduated from the College of Osteopathic Medicine and Surgery in Des Moines, Iowa in 1973, is certified in OMM and family practice, and is a Fellow of the American Academy of Osteopathy. Retired as professor and chair of the Department of Osteopathic Manipulative Medicine at COMP, he continues consulting with the school’s Department of NMM/OMM on teaching, research, curriculum analysis and development, new faculty mentorships and Predoctoral OMM Fellows. He is involved with WUHS’s Interprofessional Education program, and lectures part-time in the Graduate School of Basic Medical Sciences, among others.

Darick Nordstrom, DDS graduated from USC, DDS, Dentistry, 1975 – 1979. In practice, I found that it was common in orthodontics to remove teeth and collapse the dental arch for crowding, instead of expanding in a natural way. I began studying and adapting existing designs, focusing on the Crozat, Kernott, and a few other ‘functional concepts, and became active in the AAGO. The dedication of this academy lead to embracing the cranial concept, 3-Dimensional analysis, and encouraging midfacial growth, and pioneering their implementation in orthodontic / orthopedic practice. Following introduction to Osteopathy in the Cranial Field, I began working 4-handed with osteopathic physicians (DOs) and cranially trained DCs. Although the AAGO-type appliances were least-straining of any, the DOs would need to work around them during active treatment. With direct feedback from the DOs, I developed appliance designs that not only were cranially compatible, but were positively supportive of the body’s natural healing process, and the DO’s treatment to facilitate it.
